- 2. Claims 1-21 are now pending.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

- (e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371© of this title before the invention thereof by the applicant for patent.

5. As to claims 1, 4, 5, 19, 20, and 21 MacKenzie discloses an apparatus, method and computer program product [col. 18, lines 40-51] for managing membership of nodes in a computer network cluster, the method comprising:

a network infrastructure for supporting a plurality of nodes in a network cluster (Fig. 1); a storage device separated from the network infrastructure and interconnectable to a plurality of nodes (106, Fig. 1; and col. 7, line 21);

a message location on a sharable storage device (col. 11, lines 19-22);

a node interconnected with the storage device (Fig. 3);

a manager mechanism to grant membership in the network cluster to the node based on the node having access to the storage device, using the message location (col. 17, lines 30-56).

6. As to claims 2, 9, and 14, MacKenzie discloses an apparatus, method and computer program product [col. 18, lines 40-51] for managing membership of nodes in a computer network cluster, the method further comprising:

revoking membership of the node in the network cluster if the node ceases to have access to the sharable storage device (col. 4, lines 58-59).

Art Unit: 2858

7. As claim 3, 10, and 15, MacKenzie discloses an apparatus, method and computer program product [col. 18, lines 40-51] for managing membership of nodes in a computer network cluster, the method further comprising:

ceasing operation of the network cluster if no node has access to the shareable storage device (col. 11, lines 42-47).

8. As to claims 6, 11, and 16, MacKenzie discloses a system for managing membership of nodes in a computer network cluster, comprising:

where granting membership comprises, from the node, accessing a message location in the sharable storage device (col. 8, lines 55-60).

9. As to claims 7, 12, and 17, MacKenzie discloses a system for managing membership of nodes in a computer network cluster, comprising:

where the message location identifies the cluster by identifying at least one physical storage device from the sharable storage device that is shared by the cluster members (col. 9, lines 16-20).

10. As to claims 8, 13, and 18, MacKenzie discloses a system for managing membership of nodes in a computer network cluster, comprising:

Art Unit: 2858

where granting membership comprises accessing each identified physical storage device (col. 9, lines 22-24).

Response to Arguments

- 11. Applicant's arguments with respect to claims 1-5 have been considered but are moot in view of the new ground(s) of rejection.
- 12. In the remarks, applicant argues in substance :
- (1). That "Wipfel does not teach or suggest a manager mechanism to grant membership in the network cluster to the node having access to the storage device".
- 13. Examiner respectfully traverses applicant's remarks:

As to point (1), see paragraph above, MacKinzie does teach a manager mechanism to grant membership in the network cluster to the node based on the node having access to the storage device, using the message location (col. 17, lines 30-56)

14. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL.** See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).
